- wheel base 2,59 m

Cargo area dimensions 1720 x 1220 x 305 mm

Do you want a **100% clean and ecological** transportation vehicle? GWL/Elta is a fully electric vehicle with cargo loading area. It is a practical helper who drives **without noise and dirt** of the exhaust fumes. Additionally electric vehicles have much simple mechanical construction, much less mechanical parts. This means much less maintenance time and lower service costs. Go electric now and save money and natural resources.

This light Cargo Transportation Vehicle is primarily designed for driving out of public and community roads. It is designed for driving in industrial parks, company facility areas, airports, railways, and other places.

If requested GWL/Elta may be approved **for driving on public roads within EU**. It is designed to conform to requirements of the **EU directive 2002/24/EC**, classified as quadricycles, vehicles intended for carrying goods, category L7e. After gaining the approval, the vehicle receives **the national registration license plate** and can be driven at all public roads **without any limitation**.

Start driving electric – right now!

Vehicle Weight	Vehicle Load	CO2 Emissions
Empty vehicle w/out batteries 545 kg	(passenger and cargo load)	None
